

INDONESIA

A journey that takes you to a place once called "the epicenter of marine biodiversity". Visiting an area where a scientist once discovered 283 new species during a single dive, you will be based on a private island- diving by day to encounter pygmy sea horses, elusive walking sharks and technicolor nudibranchs, whilst

marvelling at the sight of moon jellyfish by night.

Welcome to Raja Ampat- a cluster of 600 islands off the northwestern tip of New Guinea and a sanctuary so untouched it is considered one of the least populated and least bleached underwater colonies on the planet. As an indication of the area's diversity in marine life, Raja Ampat has more than 600 species of coral whilst the Caribbean has fewer than 70. We offer a variation of this itinerary, with guests sailing through Raja Ampat, based on a luxury cruise ship. This itinerary will be for those keen on spending most of their time in the area, diving.
